

Preface

France and Finland initiated together the process of Ministerial Conferences on the Protection of Forests in Europe in Strasbourg in 1990. Following the 1992 Earth Summit in Rio de Janeiro, the notion of sustainable forest management was promulgated as criteria and indicators. Sustainable forest management was defined for Europe in 1993 in Helsinki during the Second Ministerial Conference on the Protection of Forests in Europe. The sustainable forest management criteria and indicators were proposed in Geneva in 1994 and supplemented the following year in Antalya before being adopted in Lisbon in 1998 and improved in Vienna in 2003. These indicators have gradually become established as public policy tools intended to strengthen the sustainable and multi-functional management of forests in a context of climate change. The Seventh Ministerial Conference on the Protection of Forests in Europe (Madrid, 2015) suggested updating the set of indicators for 2020.

At the same time, connexions were built between this PanEuropean process (renamed Forest Europe in the meantime) and the FAO assessment of world forestry resources: the global and European exercises thus complement each other.

France has therefore committed with the other signatory European countries to providing regular information and improving the sustainable management indicators for its forests. It has been a pioneer in this area by publishing Indicators for the Sustainable Management of Metropolitan French Forests as early as 1995 and in repeating this exercise every five years.

These twenty years of French experience in sustainable forest management indicators have prompted the preparation of the *Programme national de la forêt et du bois* (PNFB - National Forestry and Timber Program) provided for under the *loi d'avenir pour l'agriculture, l'alimentation et la forêt* (LAAF - Law for the Future of Agriculture, Food and the Forest) of 13 October 2014.

The fifth edition of Indicators for the Sustainable Management of Metropolitan French Forests is the fruit of ongoing improvement sought by the Ministry of Agriculture, Agrifood and Forest and run by a committee made up of various forestry stakeholders from the socio-professional, scientific and association environments. It has been produced by the *Institut national de l'information géographique et forestière* (IGN - National Institute of Geographic and Forestry Information) in conjunction with the public sector group Ecofor, the Inra-AgroParis Tech forestry economy laboratory and Irstea.

This new edition contains an executive summary, a summary per policy issue and summaries for each sustainable management criterion, thus making it easier for policymakers to consider all the information in it.

I should like to thank the managers, professionals, ecologists, researchers, statisticians, associations, public establishments, administrations and all forestry stakeholders who have helped to supply, analyze and develop the collected data. This participation shows the importance attached by the forestry community to monitoring forest resources and ecosystems. It strengthens France's ability to be proactive in this PanEuropean process.

Director General, Economic and Environmental
Business Performance

Catherine Geslain-Laneelle

◆ Members of the Steering Committee

Alain Bailly (FCBA), Julien Bluteau (UCFF), Luc Bouvarel (FPF), Jean-Pierre Cabaret (Medde), Jean-Michel Carnus (Inra), Fabien Carouille (DSF-Maaf), Étienne Chapelant (Maaf), Alain Colinot (CNPF), Jean-Marc Frémont (IGN), Anne Galibert (FNCOFOR), Alain Gervaise (IGN), Michel Hermeline (ONF), Irénée Joassard (SOeS-Medde), Guy Landmann (Ecofor), Isabelle Mandon (FCBN), Julie Marsaud (FNE), Luc Mauchamp (ONB-Medde), Claire Montagné-Huck (APT-Inra), Manuel Nicolas (Renecofor-ONF), Alexandra Niedzwiedz (APT-Inra), Christophe Orazio (Efatlantic), Yoan Paillet (Irstea), Jean-Luc Peyron (Ecofor), Caroline Rantien (Ademe), Christine Saint-Andrieux (ONCFS), Pauline Teillac-Deschamps (UICN), Julie Thomas (CNPF), Julien Tournout (MNHN), Daniel Vallauri (WWF), Elisabeth Van de Maele (Maaf) and Sandra Zakine (PEFC France).

◆ Members and mediators of intersession working groups

Jimmy Annet (Maaf, co-mediator of working group on game), Guilhemine Astrié (SSP-Maaf), Pierre Beaudesson (CNPF), Gérard Bedarida (ANCGG), Ingrid Bonhême (IGN, mediator of the working group on criterion 1, following on from Hélène Chevalier), Jean-Pierre Cabaret (Medde), Fabien Carouille (DSF-Maaf, mediator of the group on criterion 2), Étienne Chapelant (Maaf), Hélène Chevalier (IGN, mediator of the working group on criteria 1 and 5, prior to Ingrid Bonhême and Marie-Françoise Slak), Antoine Colin (IGN), Alain Colinot (CNPF), Marie-Laure Desprez-Loustau (Inra), Juliette Fatus (FNE), Camille Fontes-Rousseau (SSP-Maaf), Marion Gosselin (Irstea), Michel Hermeline (ONF), Irénée Joassard (SOeS-Medde), François Klein (ONCFS), Renaud Klein (ONF), Thanya Lalou (Maaf), Guy Landmann (Ecofor, co-mediator of the working group on criterion 4), Isabelle Mandon (FCBN), Julie Marsaud (FNE), Claire Montagné-Huck (APT-Inra, co-mediator of the working group on criteria 3 and 6), Francis de Morogues (FCBA), Manuel Nicolas (Renecofor, ONF), Alexandra Niedzwiedz (APT-Inra, co-mediator of the working group on criteria 3 and 6), Christophe Orazio (Efatlantic), Yoan Paillet (Irstea, co-mediator of the working group on criterion 4), Jean-Luc Peyron (Ecofor, mediator of the cross-disciplinary working group), Agnès Rocquencourt (Irstea, co-mediator on the working group on game), Christine Saint-Andrieux (ONCFS), Marie-Françoise Slak (IGN, mediator of working group 5 following on from Hélène Chevalier), Julie Thomas (CNPF) and Elisabeth Van de Maele (Maaf).

◆ Suppliers of data

CAAA, Citepa, Cniefeb, CNPF, Copacel, FFT, FNCOFOR, FranceAgriMer, FSC France, IGN, IML, INPN, Insee, Irstea, Inra-APT Forestry Economy Laboratory, Maaf (statistics and forecasting department, forest health department, etc.), Medde (SOeS, etc.), Météo France, Ministry of Finance and Public Accounting, Ministry of the Interior, MNHN, MSA, ONF, ONCFS, wild ungulate network of ONCFS-FNC-FDC, PEFC France, RNF, SFCDC, UCFF, UFC and UIPP.

◆ Written by

Stated in each part.

◆ Reviewed by

Pierre Beaudesson, CNPF (2.4.1), Fabienne Benest, IGN (criterion 4), Jean Bir, IGN (criterion 1, except 1.3, 1.3.1 and 1.4 and criterion 4), Ingrid Bonhême, IGN (entire work), Pierre Bouillon, Maaf (4.6), Vincent Boulanger, ONF (2.4.1), Jean-Pierre Cabaret, Medde (entire work), Étienne Chapelant, Maaf (entire work), Nathalie Derrière, IGN (criteria 1 and 4), Nicolas Drapier, ONF (4.9), Juliette Fatus, FNE (2.4, 2.4.1), Marion Gosselin, Irstea (entire work), Michel Hermeline, ONF (entire work), Irénée Joassard (entire work), Medde, Guy Landmann, Ecofor (4.6), Julie Marsaud, FNE (criteria 1, 2 and 3), Claire Montagné-Huck, APT-Inra (entire work), Manuel Nicolas, ONF (2.3, 2.4, 2.4.1), Alexandra Niedzwiedz, APT-Inra (criterion 5, summaries per criterion, introductory sections), Yoan Paillet, Irstea (4.1, 4.2, 4.3, 4.3.1, 4.4, 4.5, 4.6, 4.8, 4.9), Anne Pierangelo, Irstea (4.6), Jean-Luc Peyron, Ecofor (entire work), Laurence Prévost, Maaf (criterion 5), Agnès Rocquencourt, Irstea (2.4.1), Marie-Françoise Slak, IGN (2.1, 2.2., 2.3, 2.4, 2.4.1, 3.1, 3.1.1, 3.3, 4.2, 4.3, 4.8, 6.1.2, 6.2, 6.3, 6.5, 6.8), Thierry Touzet, IGN (4.7), Stéphanie Wurpillot, IGN (criteria 1 and 4, indicators 3.1 and 3.1.1).

◆ Coordination

Owner: Ministry of Agriculture, Agrifood and Forests (Elisabeth Van de Maele and Étienne Chapelant).

Project Manager: Institut national de l'information géographique et forestière (Alain Gervaise for the institutional coordination, Ingrid Bonhême for the technical coordination and Christine Boureux and Nathalie Derrière for the artwork).

Intersession mediators: Inra-AgroParis Tech forestry economy laboratory, private/public sector group Ecofor, Institut national de l'information géographique et forestière, Institut national de recherche en sciences et technologies pour l'environnement et l'agriculture (Irstea - National Research Institute for Environmental and Agricultural Sciences and Technologies).

Criterion 4 Biological diversity of forests.....179

• Criterion summary	180
• 4.1. Local specific richness of forest species	184
• 4.1.1. Proportion in basal area of the main species	189
• 4.2. Origin and regeneration of forests	191
• 4.3. Origin and natural character of forests	196
• 4.3.1. Very old dominant stands.....	198
• 4.4. Nateness of forest species	201
• 4.5. Deadwood	203
• 4.6. Genetic diversity of trees.....	208
• 4.7. Fragmentation of forest massifs	214
• 4.8. Threatened forest species	218
• 4.9. Forests and woodeed lands protected for the biodiversity	222

Criterion 5 Protective functions of forests.....229

• Criterion summary	230
• 5.1. Protection forests	232

Criterion 6 Socio-economic functions of forests237

• Criterion summary	238
• 6.1. Structure of the forest ownership	244
• 6.1.1. Integration of forests in local initiatives,	249
• 6.1.2. Training in the forestry sector	255
• 6.1.3. Voluntary sustainable management certification initiatives.....	259
• 6.2. Formation of the added value of the forest-timber-paper-furniture sector.....	261
• 6.3. Distribution of the added value of the forest-timber-paper-furniture sector,.....	265
• 6.4. State expenditure on forests.....	269
• 6.5. Jobs in the forest-timber sector	274
• 6.6. Occupational health and safety in the forestry sector	280
• 6.7. Wood consumption.....	284
• 6.7.1. Recycling and salvage.....	288
• 6.8. Imports and exports	291
• 6.9. Fuelwood	300
• 6.10. Public access to the forests	302
• 6.11. Forests with cultural or spiritual value	307

Appendices313

• Appendix 1 Definitions	314
• Appendix 2. Cross-reference between tree species and sub-species in the IGN forest inventory data	320
• Appendix 3 Dates of departmental field surveys under previous forest inventory method.....	322
• Appendix 4 Dates of aerial photographs used to create the forest mapping	326
• Appendix 5. Nateness of tree species found in metropolitan forests.....	328
• Appendix 6. Lost of threatened forest species	332
• Appendix 7. Classification and definitions of national protected areas in the FRA, MCPFE and IUCN.....	340

Introduction

The 2015 edition of *Indicators for the Sustainable Management of Metropolitan French Forests* provides a detailed overview of the state and evolution of the forests and their related economic and social activities.

This document is structured to provide several reading methods:

- a **quick run-through** with executive summary and a summary of trends per policy issue.
- **focusing on a theme**, with a summary for each sustainable management criterion.
- **detailed investigation** of each indicator.

Every indicator sheet shows, in succession, the **purpose** of the indicator, the **results** as data tables or graphics, the **analysis** of the results and lastly the **data sources and methodology**. The analyses always start with a heading in bold showing the main results, so that a quick run-through is also possible for a precise indicator.

In addition, Appendix 1 lists definitions for technical terms and breaks in series are shown in the graphics or tables by a vertical red line.

Lastly, all data presented in the 2015 edition of Indicators for the Sustainable Management of Metropolitan French Forests is made available for the first time on the website of the *Institut national de l'information géographique et forestière* (under forest inventory > Themed activities > Sustainable management indicators <<http://inventaire-forestier.ign.fr/spip/spip.php?rubrique80>>).

Enjoy the document!
